

Atlas

Why?

New to the market in 2019 and the newest member of Satellite | PolyPortables ADA compliant wheelchair accessible units is the Atlas. The Atlas features upgrades that will take the wear and tear off your operators when servicing and moving the unit around. While providing the end user with a truly remarkable experience.

Its deep sump waste tank makes it easy to remove waste and its ergonomic handles help eliminate hand fatigue while moving the unit around. The truClose hinges and beveled floor make entering and exiting a breeze for people in wheelchairs. The Atlas also comes with a brand new style roof, with reinforced plastic ridges. This eliminates roof flex from heavy snow or over tightened straps.
